

THUNDERSTAX WHITE PAPER

The Ultimate Cryptocurrency

What is The Purpose of THUNDERSTAX?

1. It's primary purpose is to fund THUNDERACCESS, a very unique news and social network. One crucial aspect of THUNDERACCESS is that people are actually paid (in crypto), to use the platform. Facebook, Twitter and LinkedIn do not have this feature.
2. Unlike ALL the other cryptos who are trying to circumvent the law (The SEC), THUNDERSTAX will become SEC registered.
3. Unlike other social networks, ALL users and content creators will retain 100% ownership of their content.
4. Very business friendly. Unlike other social networks, people and businesses will have the full ability to promote their business or passion. Example: You will be able to post affiliate links and not be heavily scrutinized on your content or ads.
5. Unlike other social networks, our users can be actual reporters including "microphone flags" and press credentials. Literally, there will be thousands of THUNDERACCESS reporters around the world. Example: Let's say you see a car accident, you can whip out your cell phone and report the news. REAL PEOPLE. REAL NEWS.

6. Unlike other social networks, there will be additional benefits and services available through their THUNDERACCESS account. Some of these features will include file storage, department of jobs and over 15 other benefits and services to help a business grow and save on operating expenses.

7. Unlike other social networks, THUNDERACCESS will have a Content "Super Fund" so that users can be paid on their followers and their followers and so on.

8. THUNDERACCESS will be a Global platform. Think of it as a combination of TWITTER, FACEBOOK and CNN, only better.

10. We'll also have our own programming and co-programming from other content creators. This will also include in-house studios.

11. Celebrities will have preferential treatment. Why? Because they'll bring their following over from other social networks. And, it's not just because it's another social network, it's because they have a strong financial reason to do it as they are paid on their followers and their followers and so on.

12. THUNDERSTAX still has a few decisions to make before completion. Example: Using blockchain as a stand-alone, or, going through Ethereum, the amount of crypto allocated and so on.

13. Money raised will not only be used for THUNDERACCESS, but to have the finest in technology to implement and oversee both the THUNDERACCESS and THUNDERSTAX platforms.

14. Another basis of our success is the following cryptocurrencies. www.filecoin.com who's raised over 200 Million within 30 days. The purpose of their coin is to increase storage capacity for internet files. Then, there's www.tezos.com who has raised over 232 Million Dollars. The purpose of their coin is to increase more usability for Bitcoin. Although these coins sound ok, they don't have the mass appeal and "cool" factor that THUNDERACCESS offers. In addition, they also are running the risk of NOT being SEC registered.

15. THUNDERSTAX should launch at 1¢ per coin. Based on the validation of other coins who DO NOT have our advantages, we anticipate our coin going to at least \$100 each.

16. And finally. We're also creating THUNDERSTAX to help fund an incredible CURE for CHILDREN. The CURE is currently helping hundreds of children. And, it doesn't just work sometimes, it works each and everytime and the cost is only 44 cents to do it.

Giving911[®]

CURE A CHILD FOR JUST 44¢

A "single pill" kills the parasite (worms) and helps restore their tiny bodies to full health. Become part of our program and save thousands of childrens lives!

It's Not Just Amazing, It's a Miracle ...
