

Leslie Robert Wolfe

Grew up in Mason City and Des Moines, IA ...
Currently residing in Sunnyvale, CA and Las Vegas, NV.

Started in business by selling vacuum cleaners.

Bought a distributorship called "Peoples Discount Club Of America."

The concept put businesses together with consumers looking for a discount.

Created C.I.S.A. ... Counter Intelligence Security Association.

Sold "James Bond" type equipment.

Created Mr. Publicity.

Offered Public Relations for Las Vegas lounge acts.

Produced Direct Response Commercial: The Back Booster.

A back-support product worn underneath clothing. Retail: \$19.95.

Produced Direct Response Commercial: Elvis Presley "Trivia Game."

A board game about the life of Elvis Presley. Retail: \$29.95.

Created Direct Response Commercial: Stop Smoking Product.

Similar to "Cigarest." Retail: \$19.95.

Created a "Business Opportunity Segment" For Family Guide Network.

Kevin Harrington who at the time was in charge of programming, let me run a 4-minute segment about a "Mail Boxes Etc." type franchise. Retail: \$40,000.

Produced Direct Response Informercial: Shower, Water-Filter System.

30-Minute informercial. Ran on Late-Night Discovery and Playboy Channel.

Created a Six-Hour Program Called: Conversation With The Candidates.

I ran for office (Public Administrator in Las Vegas) in 1998 and used the program to promote myself and other candidates running for office. This included: Governor, Lieutenant Governor, State Senate, Congress, County Commissioners and Attorney General. I Executive Produced and hosted the program along with three other talk show hosts.

Created The "Business Opportunity Radio Show."

A One-Hour, 12-Week Run. Station: KDWN (50,000 Watts). Did the show directly from KDWN studios. The show featured companies with various opportunities that paid a promotional fee to be on the program.

Created "How To Start Your Own Radio Show - Guaranteed!"

Basically it's a short, home-study course how people can have their own Radio Show on an actual Radio Station (not just the Internet). This is a great marketing concept especially for business professionals. It drives a lot customers and credibility.

Created "How to Cold Call, Without Cold Calling" Module.

This easy-to-learn process gets people past the gate-keeper over 90% of the time. Truly a simple work-of-art. Eliminates fear of cold calling.

Created a Full-Page "Mail Order Ad" Business Opportunity.

The ad did very well. But initially I thought it had failed. The cost was \$8,000 (at the time), to be in Three (3) Business Opportunity Magazines. I got a little over 500 orders at an average of \$17 each. So I made around \$500. I thought for all the labor and time it took, it really wasn't worth it. Then, over a period of one year from when the ad was published, it brought in almost \$20,000. This was from re-orders and seven (7) continued snail-mail, mail-outs on newly added services. (See the ad upon request).

Created The "26% Response Letter" Lead Generator.

Created a simple letter that can get an average of 26% response for leads. The letter works for most businesses. The primary reason it gets people to contact you is because you're not selling, you're telling.

Created The "Conversion Jump" Business Model.

Simple easy to implement process to increase found money for virtually any business, yet most businesses are not using. Think of it as a low-cost, instant up-sell where you'll get a 20% - 80% conversion jump.

Created "Smog Check - Guaranteed to Pass!" Business Model.

Consulted to an Auto Repair and Smog Check business. Here's what I created. People brought their auto in for a guaranteed-to-pass smog check. The auto was hooked up to a smog-check machine, NOT hooked up to the DMV. This was only to see if the auto would pass the smog check (or not). If it did, the auto would then be hooked up to the DMV required machine for smog certification.

If it DIDN'T pass the smog check, this means that the auto needed a tune-up or bigger repairs which is where the money is. Once tuned-up or repaired, the auto was again hooked up to the NOT hooked to DMV machine to see if it would pass, assuming it did. Now the repaired auto would be hooked to the DMV required machine for certification. In other words, all customers we're guaranteed to pass the Smog Check, providing, any repairs needed we're done through the auto shop.

- This was a very strong business model -

Created The "Reverse Negotiating" Business Model.

This system allows the customer to CLOSE YOU, thereby creating MORE sales for your product or service. Works great with digital products such as software, home-study courses, coaching, domain sales and information. Works best with high-end pricing: \$500 - \$100,000. This business model has increased sales by as much as 200% to 300%.

Created The "Login Rebates" Business Model.

This patent-pending process makes MORE MONEY with rebates, building a buyers list, getting more customers to come back to your location at least a second time and more. This business model is much better than just offering discounts. Perfect for retail businesses.

Created The "Top-Secret Boss" Business Model.

Are you familiar with the CBS TV Show Hit, "UnderCover Boss"? ... If not, it's where CEOs go "undercover" to find out what's really going on in their company and how to make improvements. It costs somewhere around \$1 MILLION DOLLARS to be featured on that TV Show.

With my Top-Secret Boss™ 14-Minute Video, we show small and medium-sized businesses how they can do the same thing without going undercover.

This business model can make vast, immediate results.

Created The "Support Local Business Day" Business Model.

Support Local Business Day is where we suggest consumers make a purchase from a LOCAL business every 3rd Friday of the Month. Just this one little thing can increase jobs dramatically. Merchants can get a free color poster to place in their windows or offices and supporting logos for their website. It brings in more business.

Created The "CC Certified Concept" Business Model.

What is a CC Certified Concept? it's an unbiased third-party entity where you can register your concept, idea or invention. Once registered, the recipient receives an immediate registration number that can be used in all promotional, marketing materials and websites. It's further "proof of inception" about virtually anything someone created. If someone has to go to court, the more "evidence" that's presented, the better off they are.

Here's what the registration mark looks like:

CC Certified Concept Reg. No. 481XXXXX

Created The "Chamber Of Commerce Network" Business Model.

In the year 2000, I started the Blue Diamond, Nevada, Business Chamber Of Commerce. It was me and a few other people. After a year the other people decided it wasn't worth their time, so I took over all operations. As I added more benefits to the Chamber, I realized it could be done on a National basis. So I also created the Chamber Of Commerce Network.

The idea is to make the membership so powerful, that people had to join.

Our Platinum Membership (the only one we have) retails for \$395.

However, with a strong referral they can get it free. The Chamber now has a 15-year impeccable track record. The membership is primarily used as a premium or incentive for licensing purposes.

Created The "Chamber Of Commerce Network" AAA+ Rating.

What other Chambers won't do is give members an endorsement. You can be a member, but they will not endorse your business. We give the business a AAA+ Rating and a guarantee that we will not tarnish their name in the the media or publish complaints like the BBB does.

Created The "Chamber Of Commerce Network" Restaurant 5-Star Rating.

This 5-Star Rating business model guarantees fine-dining restaurants at least \$60,000 in additional profits per year. They choose which entree and dessert is suited for the 5-Star Rating. Now that they have it, those items will increase in sales and profits. Restaurants cannot lose.

Created The "How to Tout Your Website Correctly" Module.

DID YOU KNOW ... More than 90% of people who "tout" their website in person, over the phone, on Radio or TV are doing it wrong? AND, It doesn't stop there! People also "tout" their name, email address and phone number wrong as well. Guess what? Problem solved within minutes.

Created The "WhaleOfAnIdea.net" TV Show Business Model.

What is Whale Of An Idea? It's similar to the TV Show "Shark Tank." However, one of the main, big differences is that instead of the judges investing in the various projects they're presented with, the audience gets to do that. How? by purchasing or pre-purchasing the product or service from their favorite contestants. To see our video concept of the TV Show, go to: www.WhaleOfAnIdea.net

We also air cool products, services and business models that don't necessarily need funding, but because there COOL!

Created the first CrowdFunding Platform With a Network Marketing Aspect.

When I created this platform, there was over 400 CrowdFunding platforms already in the market place, but none that could fund peoples projects like this could. This also led to ...

Compounded Funding™

This is where people funding a project, could actually have there project contributions become exponential.

Matching Contributions™

This was where people could have their compounded funding, 100% matched with equal funds to raise even more money.

Next Level Africa (nextlevelafrica.com).

Did an "exit" with this Crowdfunding platform.

Next-Generation Crowdfunding (nextgenerationcrowdfunding.com).

Did an "exit" with this Crowdfunding platform.

Here's a Few Thoughts ...

Is The Glass Half-Empty? Or Half-Full? (defined).
"If you're a taker, the glass is half-empty. If you're a giver,
the glass is half-full. Which are you?"
