

THUNDERSTAX WHITE PAPER

The Ultimate Utility Token

How Will THUNDERSTAX TOKENS Be Used?

1. Their primary purpose is to fund and create more features for THUNDERACCESS users. THUNDER ACCESS is a very unique news and social network. One crucial aspect of THUNDERACCESS, is that people are actually paid (in crypto), to use the platform. Facebook, Twitter and LinkedIn do not have this feature.
2. Unlike other social networks, ALL users and content creators will retain 100% ownership of their content.
3. Unlike other social networks, users will have the full ability to promote their business or passion. Example: You can post affiliate links and not be penalized on your content or ads.
4. Unlike other social networks, our users can qualify to be reporters, with "microphone flags" and press credentials. There will be thousands of THUNDERACCESS reporters around the world. Example: Let's say you see a car accident or other incident, you can whip out your cell phone and report the news. REAL PEOPLE REPORTING™.

5. Unlike other social networks ... with your free account, you'll receive valuable benefits and services such as, file storage, Department of Jobs™ (free) and over 15 other benefits and services to help your business grow and save on operating expenses.

6. Unlike other social networks, THUNDERACCESS has a Content "Super Fund" so that users can be paid on their followers and their followers and so on.

7. THUNDERACCESS a Global platform. Think of it as a combination of TWITTER, FACEBOOK and CNN, only better.

8. We'll also have our own network programming and co-programming from other content creators. This will also include in-house studios.

9. Celebrities can monetize their fan base. How? Because they'll bring their followers over from other social networks. It's not just because it's another social network, it's because they have a strong incentive to do so since they are paid on their followers, their followers and so on. AND, celebrities will NOT have to worry about their content being scrutinized.

10. Money raised will not only be used for THUNDERACCESS, but to have the finest in technology to implement and oversee both the THUNDERACCESS and THUNDERSTAX platforms. Think of us as a "decentralized" platform with oversight™.

11. More proof of our success is the following cryptocurrencies. First, www.filecoin.com raised over 200 Million within 30 days. The purpose of their coin is to increase storage capacity for internet files. Then, www.tezos.com raised over 232 Million. The purpose of their coin was to increase more usability for Bitcoin. Although these coins sounded ok, they are boring. They didn't have the mass appeal and "cool" factor that THUNDERACCESS offers.

12. TOTAL TOKEN SUPPLY: 30 Billion Tokens. TARGET AMOUNT SOLD: \$300 Million USD. PRE-SALE PUBLIC PRICE: 1¢ Per-Token USD. PRE-SALE BONUS: 20% in additional tokens per-token-purchase. Buyers must be accredited investors. 50 Million Cap.

13. THUNDERSTAX should launch at 1¢ per token. Based on the validation of other coins that DO NOT have our advantages, we anticipate our coin going to at least \$100 each (compared to Bitcoin at \$6,054: 10/20/2017).

14. Finally, we're creating THUNDERSTAX to help fund an incredible CURE for CHILDREN in third-world countries that get parasites (worms) from drinking contaminated water. Without this effort, more than 5 Million children will die each year. The cure is being utilized right now.

Giving911[®]

CURE A CHILD FOR JUST 44¢

A "single pill" kills the parasite (worms) and helps restore their tiny bodies to full health. Become part of our program and save thousands of childrens lives!

It's Not Just Amazing, It's a Miracle ...

15. Furthermore, up to \$20 MILLION USD FROM TOKEN SALES will be used to purchase a UNITED STATES FDIC INSURED BANK. Its main purpose is to offer THUNDER ACCESS members unique financial services.

Another application would be a payment solution where virtually any business could accept credit-card and debit-card payments and NEVER have to worry about chargebacks. We have this technology now. Think of it like Paypal or Stripe only we take away all the pain for the merchant, and the Bank has NO RISK.

16. **Will The Token Rise In Value?** ... Yes, it will and here's why. Think in terms of buying a home. For the most part, people buy a home to live in (it's a utility). However, the value of the home can certainly GO UP. Our Token is a utility that will be used to add incredible services to THUNDERACCESS making it a highly useful and very productive platform.

EXAMPLE: Our initial value of each token is 1¢ USD. We anticipate the value of the token going to \$200 or more USD. If 1 MILLION tokens were purchased at 1¢ each (or \$10,000) and the value of the token goes to just one dollar each, that's 100X your money (or 1 Million Dollars). This gives buyers a nice margin should they choose to exit.
